TITLE: INTEGRATED CIRCUIT ARRANGEMENT AND METHOD FOR
THE MANUFACTURE THEREOF

RESPONSE TO OFFICE ACTION

Assistant Commissioner for Patents
Washington, DC 20231

Sir:

Response to the Office Action mailed July 13, 2001, Applicants offer the following amendment and remarks.

IN THE SPECIFICATION

On page one, cancel the last paragraph and insert therefore the following new paragraph:

- - When the useful structures and the filler structures are composed of conductive material, then a charging of the filler structures can occur during operation. In order to avoid this, the filler structures are applied to a fixed potential, as disclosed in Widmann, et al. This contacting ensues via specific wiring arranged in a metallization plane above the useful and filler structures. This additional wiring and the contacts between the additional wiring and the filler structures make production of the layout more difficult. - -
